

MEGÈVE, WATER TRAILS

As part of its development of the "water" and "mountain" themes, Megève has recently finished setting up its "water trails". These are genuine discovery trails aimed at anyone keen to know more about this water, (so omnipresent in the village with its streams, its fountains, its rapids and its springs), about how Megève got its name (mag eva - the village surrounded by water), and about "Megève water" distributed by the local chemist in 1902...

THREE TRAILS HAVE BEEN DESIGNED

- **The two bridges.** A half an hour walk in the heart of the village, between the two historical bridges of Megève. Here you can appreciate the fountains and the rivers that flow through the center of the town. This walk is particularly suitable for those seeking a leisurely wander and for families with young children.
- **The Creux Saint-Jean.** Approximately an hour's walk from the village center to a corner of paradise where nature will spread its treasures before you. A waterfall where you can appreciate the freshness and calm, a truly bucolic wander, taste the spring water and discover the geology of this site.
- **The third walk leads you to the delightful lake of Javen.** Follow the streams and torrents and allow the cool and calm of the riverside bring you a feeling of well being. Your cup will always be full in Megève.
